QUALITY POLICY

Australian Safety Engineers (ASE) is a one-stop sales and service provider for all fire, life support, safety, breathing and high pressure equipment and systems. ASE also provides complete Marine Vessel fire and safety equipment servicing to the relevant Regulatory Authority.

Australian Safety Engineers (ASE) is firmly committed to the implementation and maintenance of a Quality Management System which complies with the requirements of the International Standard ISO 9001 and by doing this, ASE seeks to consistently provide high quality products and services, as well as to enhance customer satisfaction, support innovation and drive efficiency.

Australian Safety Engineers is committed to:

- Maximising customer satisfaction by providing quality products and services and ensuring work is completed in full conformance with customer and ASE quality requirements;
- The continuing improvement of the Quality Management System to meet all relevant certification, accreditation, legal and regulatory requirements;
- Promoting awareness of the Quality Management System and ensuring company personnel are aware of the Quality Standards;
- Training and development of company personnel so as to maintain a high level of skill, expertise and overall competence;
- Defining measurable objectives for trend analysis to identify improvement opportunities as well as possible emerging performance deficiencies;
- Supporting and developing an organisational culture committed to quality excellence and continual improvement.
